Time-line estimates (rounded to nearest ¼ -hr)
1. Testing dummy structs and macros
    a. 30 min.
    b. No dependencies
2. Complete testing suite
    a. 2 hr.
    b. 1 FS
3. Attraction Ranker (all variations)
    a. 2hr
    b. 2 FS-(1hr)
        i. Chart shows possible break-downs w/split 2. No parallel working capacity.
4. Chooser
    a. 2hr
    b. 2 FS, 3 FS
5. Crowd Director
    a. 2 hr
    b. 4 FS
6. Testing suite with live modules
    a. 15 min.
    b. 2 FS, external modules completed
        i. This time is uncertain
7. Final integration
    a. 45 min.
    b. 5FS, 6 FS

Notes:
The gray column represents the unknown time requirements of other contributors' modules. Assuming they finish after [5], then there will be an additional hour of work from when they finish.
The bottom 3 rows represent the assumption that they finish before [5], with [6] spread across possible time-slots and [7] placed appropriately.
